*Trinity Term 1994*

## From the President...

Summertime, and the living is easy. Unless of course you're a finalist. It's Trinity Term again, when the attractions of punting, Pimm's and a multitude of interesting exams conspire to keep us away from all those societies we really meant to go to this term.

I hope that this termcard may alter your plans a little, with events that you should find both interesting and entertaining. In following with the current empowerment fashion, we have not only the usual opportunities to hear interesting speakers and get involved in the running of the club, but also more chances for us to put forward our own views and ideas on the important issues facing us in this term's "Open Forum" events. The Oxford Reform Club was founded to allow students to get involved with politics outside the narrow confines of the various party standpoints, and I hope that this term's events will allow you, whatever your politics, to do just that.

I trust that you will find being involved in the Reform club as interesting and enjoyable as I have, and I wish you all a successful term.

Matthew Redwell
